

ANNA PATRICIA BOLOR VIDA

Quezon City | +63 9604730138 | annapatriciavida12@gmail.com | linkedin.com/in/annavida12 | github.com/Anna-Vida | annavida.vercel.app

Professional Summary

Information Technology graduate with hands-on experience building web, mobile, backend, and database-driven applications. Skilled in React, React Native, Node.js, REST APIs, PostgreSQL, Supabase, Firebase, Java, Python, and SQL, with a strong focus on developing reliable, scalable, and user-centered software solutions.

EDUCATION

Technological Institute of the Philippines

Bachelor of Science in Information Technology

June 2026

WORK EXPERIENCE

Ateneo Innovation Center

Quezon City

Software Developer Intern

Jan 2026 – Apr 2026

- Developed two offline-first mobile applications for healthcare and AgTech use cases using local caching, OCR, and cloud synchronization.
- Built responsive computer vision interfaces and dashboards integrating Meta Ray-Ban smart glasses for obstacle and debris detection.
- Assisted in developing data ingestion workflows and integrating machine learning models with cloud services for disaster-resilience research.
- Programmed microcontrollers and backend components for environmental monitoring and continuous sensor-data collection.

PROJECTS

ServEase — Full-Stack Business Operations Platform | 2026

- Built a role-based business operations platform with customer, staff, and admin workflows using React, TypeScript, Supabase Auth, and PostgreSQL Row Level Security.
- Implemented service management, payments, analytics, staff assignment, audit logging, and database-driven workflows, with deployment on Vercel.

EchoWear — Smart Glove Translator for Filipino Sign Language | 2026

- Developed a wearable and mobile prototype for Filipino Sign Language recognition using ESP32, flex sensors, motion sensing, and Bluetooth Low Energy.
- Integrated Bluetooth Low Energy, on-device machine learning inference, and speech output for gesture-to-speech interaction.

Stock Market Dashboard and Forecasting Demo | 2026

- Built a full-stack market dashboard with live stock data, authentication, watchlists, alerts, price targets, and persistent user data.
- Developed backend and database functionality using Express APIs, PostgreSQL, and Row-Level Security for secure user-specific data.

Skills

- **Programming:** JavaScript, TypeScript, Python, Java, SQL, C, C++
- **Frontend and Mobile:** React, React Native, HTML5, CSS3, Tailwind CSS, Vite, Expo, Android Studio
- **Backend and APIs:** Node.js, Express, REST APIs, Supabase, Firebase, Authentication & Authorization
- **Databases:** PostgreSQL, MySQL, SQLite
- **Cloud and DevOps:** GitHub, Docker, CI/CD Fundamentals, Vercel, Render, AWS Fundamentals
- **Testing and API Tools:** Postman, Swagger/OpenAPI, Jest Fundamentals, Visual Studio Code, Linux, Bash
- **Development Tools:** Visual Studio Code, Linux, Bash, Git, Agile/Scrum
- **Additional Exposure:** TensorFlow Lite, OCR, Arduino, ESP32, Raspberry Pi, Bluetooth Low Energy, AI API Integration

Certifications

Google: Crash Course on Python (Issued Feb 2026) | Using Python to Interact with the Operating System (August 2026)
