

ANNA PATRICIA BOLOR VIDA

Quezon City | +63 9604730138 | annapatriciavida12@gmail.com | linkedin.com/in/annavida12

Professional Summary

Information Technology graduate and aspiring Software/Application Developer with hands-on experience in cross-platform mobile engineering, offline-first architectures, and full-stack development. Eager to contribute foundational skills in building scalable applications, local data caching, and integrating APIs to a collaborative development team.

EDUCATION

Technological Institute of the Philippines

Bachelor of Science in Information Technology

June 2026

WORK EXPERIENCE

Ateneo Innovation Center

Quezon City

Software Developer Intern

Jan 2026 – Apr 2026

- Engineered two offline-first mobile applications for the Healthcare and AgTech sectors independently, implementing local database caching, OCR protocols, and cloud synchronization to achieve zero-latency performance.
- Developed responsive computer vision web interfaces and control dashboards from scratch, integrating Meta Ray-Ban AI Glasses Gen 2 as edge hardware to facilitate real-time obstacle and debris detection.
- Built automated data ingestion pipelines and integrated machine learning models with cloud backends for a disaster resilience research initiative.
- Programmed microcontrollers and architected backend control systems for environmental weather stations to enable continuous real-time data streaming.

UNIVERSITY PROJECTS

EchoWear: Smart Glove Translator for Two-Way FSL Communication | 2026

Mar 2026

- Engineered an ESP32-based wearable using MPU-6050 sensors for high-accuracy FSL gesture-to-speech translation.
- Deployed LSTM machine learning models via TensorFlow Lite for real-time sign language recognition on edge devices.
- Integrated Supabase for backend database architecture and seamless cloud data synchronization.

PocketHive: AI-Powered Personal Finance and Expense Management Application | 2025

Aug 2025

- Developed a mobile budgeting application featuring automated expense tracking and AI-driven financial insights.
- Integrated Firebase for real-time data synchronization and secure user authentication.
- Documented technical workflows and system architecture for core bill reminder and payment tracker modules.

PourDecision: Smart Liquor Consumption Tracking and Level Monitoring System | 2024

Feb 2024

- Built responsive frontend modules and admin dashboards for inventory tracking and secure checkout processes.
- Implemented Location APIs and an Age Verification system to ensure legal and regulatory compliance.
- Authored comprehensive system requirements and administrative workflows to streamline maintenance.

Skills

- Mobile Engineering:** React Native, Jetpack Compose, Ionic, Dart (Flutter), Android Studio, Offline-First Architecture, Local Caching
- Frontend & Web:** React.js, Next.js, TypeScript, JavaScript, HTML5, Tailwind CSS, Vite, MUI, Redux
- Backend & APIs:** Node.js, PHP, REST APIs, Python, Java, C/C++, Kotlin
- Databases & Storage:** Supabase (PostgreSQL), Firebase, MySQL, SQLite
- Cloud, DevOps & Tools:** Git/GitHub, Docker, CI/CD Workflows, Linux (Ubuntu/Kali), Bash Scripting, GitHub Copilot, Cursor
- AI, IoT & Security:** TensorFlow Lite, Edge Computing, OCR, Image Recognition, Microcontrollers (Arduino, Raspberry Pi), Wearable Tech

Certifications

Google: Crash Course on Python (Issued Feb 2026) | Using Python to Interact with the Operating System (August 2026)
